

```
#include <stdio.h>
```

```
int main() {
```

```
    // Variables to store the three characters
```

```
    char char1, char2, char3;
```

```
    // Read three characters from the user
```

```
    printf("Enter first character: ");
```

```
    scanf(" %c", &char1); // The space before %c is to skip any whitespace
```

```
    printf("Enter second character: ");
```

```
    scanf(" %c", &char2);
```

```
    printf("Enter third character: ");
```

```
    scanf(" %c", &char3);
```

```
    // Print the characters in reverse order
```

```
    printf("Characters in reverse order: %c %c %c\n", char3, char2, char1);
```

```
    return 0;
```

```
}
```
