

```
#include <stdio.h>
```

```
int main() {
```

```
    float rupees;
```

```
    int paise;
```

```
    // Read amount in Rupees from user
```

```
    printf("Enter amount in Rupees: ");
```

```
    scanf("%f", &rupees);
```

```
    // Convert Rupees to Paise
```

```
    paise = rupees * 100;
```

```
    // Display the converted amount in Paise
```

```
    printf("Equivalent amount in Paise: %d\n", paise);
```

```
    return 0;
```

```
}
```
