43. C program that reads the floor number and displays the appropriate view based on the floor number:

```c
#include <stdio.h>

Int main() {

    Int floorNumber;

   // Read the floor number from the user

    Printf("Enter your Floor number: ");

    Scanf("%d", &floorNumber);

    // Check if the floor number is valid and display the corresponding view

    If (floorNumber > 50) {

        Printf("We have only 50 floors.\n");

    } else if (floorNumber % 2 == 0) {

        Printf("Heyy you have \"Beach View\" for your Flat.\n");

    } else {

        Printf("Heyy you have \"Forest View\" for your Flat.\n");

    }

    Return 0;

}
```
